

## M120 - E/12 FILTER REGULATOR AND LUBRICATOR GROUP

FITTINGS FOR COMPRESSED AIR › COMPONENTS FOR INDUSTRIAL COMPRESSED AIR PLANTS › AIR TREATMENT GROUPS FOR PLANTS

The **E/12** groups combine the **E/14** filter-regulator function in a single unit and lubricator **E/11**. The filter-regulator **E/14** is designed to remove liquid and solid purities in pneumatic systems. They are modular filters equipped with a **PE filter cartridge** which retains impurities larger than **40 µ**.

On request you can have different degrees of filtration **5 µ** or **20 µ**.

The operation of the **E/11** mist **lubricator** is based on mixing immediate use of the oil. This mixing is optimal even with small air passages.
