

## PARTICULATE FILTER P15

*AUTOMOTIVE GAS EXTRACTION EQUIPMENT › EHC PORTABLE FILTERS FOR INDUSTRIAL VEHICLES*

THE FILTER WORKS IMMEDIATELY ON START and offers maximum flexibility inside and is not affected by humidity. The filter separates mutagenic, carcinogenic and allergic substances attached to the exhaust gas particles. The lifespan depends on the size of the engine, the type of engine, the quality of the diesel, how the vehicle is used and the condition of the engine.

### Technical data

Reduces particles > 99% Including mutagenic, carcinogenic and allergic substances that attach to particles.

Max engine displacement > 4 litres

Max. Temperature 200°C

EHC P15 filter life > 200 starts approximately.

The life of the filter depends on the displacement, type and condition of the engine.

The filter must always be used at minimum rpm.

Weight: overall 0.4 kg

The EHC P15 Filter complies with TRGS 554 (D), COSHH (GB), VERT (CH) B272 emission regulations. The used EHC filter can be disposed of in solid municipal waste.

**The filter is equipped with a replaceable cartridge with the EHC spare part code 4160101**

**SOLD IN A PACK OF TWO PIECES MINIMUM.**
