

## FLEX HOSE HT 900\_hs

HOSES › Gas and hot smoke extraction pipes

Flexible hose in technical fabric resistant to very high temperatures up to 900° C. Made of a double layer of fabric: the first in SILICA VERMICULITE, the second intermediate layer in INCONEL GLASS.

GREY COLOR.

Entirely hand-sewn structure.

The external metal spiral is protected by a yellow heat-resistant tape.

The ends of the pipes are packaged without metal spiral, otherwise known as end sleeves, in order to have a greater seal on manifolds or connecting sleeves.

Particularly suitable for their excellent tensile strength.

[Mastertubi.it/q?380](http://Mastertubi.it/q?380)

**OPERATING TEMPERATURE: -60° +900°C**

DIAMETERS FROM Ø 102 TO Ø 1200 mm

Theoretical bending radius 1 x Øinternal

Operating depression from 500 to 300 mmWS / mmWG

Operating pressure from 3 to 0.75 KPa

Available with hooks or suspension rings (optional)

FLEXIBLE HOSE SUITABLE FOR DELIVERY AND EXTRACTION OF HOT FUMES, ENGINE EXHAUST GASES, SUPERHEATED AIR.
