

FLEX SWEEPER HOSE / O

HOSES › Flexible rubber hoses for suction of highly abrasive solids

Rubber hose for street sweepers, mounted on lower side arms, conveys the material sucked up from the ground to be fed into the upper tank.

NR (NATURAL RUBBER) or amber Para rubber underlayer with thickness on request, highly anti-abrasive.

Black anti-abrasive corrugated SBR cover with fine canvas impression, resistant to traces of oil, ozone and atmospheric agents.

Textile reinforcements and steel spiral embedded in the wall.

Mastertubi.it/q?420

The hose is supplied with sleeves at the end of the length according to customer specifications (also with enlarged mouths) without spiral to facilitate the tightening and holding of the fastening clamps.

Size OR mm	Radius of curvature mm	Weight Kg/m	Roll m
