

METAL PU HOSE - FOOD GRADE

HOSES › Flexible hoses for liquids suitable for food use › TUBES FOR EXTRA VIRGIN OLIVE OIL

Transparent ether-based polyurethane tube **with steel reinforcement spiral**.

Completely smooth internal and external surfaces to facilitate the passage of substances and for easier cleaning and disinfection before and after use.

Highly impermeable to odors and flavors, it preserves the organoleptic properties of the transported substances.

Excellent resistance to hydrolysis and microbial attack. Curing-free material.

It can be made conductive by grounding the coil.

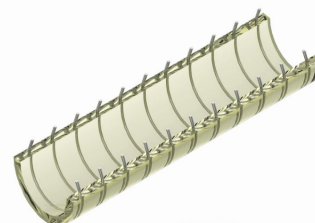

Suitable for suction of highly abrasive and food grade liquids, powders and granules

(flour, sugar, salt, dried fruit); transport of liquid foods, olive oil and fatty foods,

pharmaceutical liquids with an alcohol concentration of up to 20%.

Operating temperatures: -40°C +80°C

Food Grade according to European Regulation EU Regulation 10/2011 (classes A, B, C, D1, D2, E)
