

M220 - E22 - Filter-regulator and lubricator assembly

FITTINGS FOR COMPRESSED AIR › FITTINGS AND CONNECTIONS FOR PNEUMATIC SYSTEMS › F+R+L air treatment units and accessories

GENERAL CHARACTERISTICS

The E/12 groups combine the E/24 filter-regulator and E/21 lubricator functions in a single unit.

The E/44 filter-regulator has been designed to remove liquid and solid impurities in pneumatic systems. They are modular filters equipped with a PE filter cartridge that retains impurities with dimensions greater than 40 μ . Different filtration degrees 5 μ or 20 μ can be obtained on request.

The E/21 mist lubricator works by immediately mixing the oil. This mixing is optimal even with small air passages.

TYPES:

M 220 - E/22: Modular filter-regulator and lubricator group with technopolymer cup.

M 220 - E/22-P: Modular filter-regulator and lubricator group with metal cup.

M 220 - E/22/SC: Modular filter-regulator and lubricator group with technopolymer cup and automatic drain device.

M 220 - E/22/SC-P: Modular filter-regulator and lubricator group with metal cup and automatic drain device.
