

POLYURETHANE SEWAGE HOSE

HOSES › Flexible hoses for liquid suction for industrial, agricultural and sewage disposal

Extremely robust and flexible hose with a special, super-elastic compound and a smooth, abrasion-resistant polyurethane inner liner. External reinforcement spiral made of rigid, impact-resistant and crush-resistant PVC. Its main feature is the extremely high abrasion resistance of the polyurethane inner liner combined with the great flexibility afforded by the special, super-elastic compound. Excellent resistance to weathering, aging, and most chemicals.

Mastertubi.it/q?1062

TEMPERATURE OF USE: -25°C +60°C

APPLICATIONS:

For particularly heavy-duty applications requiring high abrasion resistance. Suitable for unloading or suctioning cement, grain, sand, gravel, concrete, etc.

COLOR: gray outside, red inside.

ROLL: twenty meters
