

TRELLJET 681 AP TUBE

HOSES › Hot water hoses

Specially designed for professional and industrial high pressure cleaning.

The antimicrobial TRELLJET 681 is suitable for all environments where bacteria are involved: cleaning companies, food industries, pharmaceuticals, packaging/bottling, healthcare institutions, schools, etc. Suitable for mobile pressure washers, fixed installations and reel-mounted applications.

The tube is supplied with a Certificate of Suitability for Antimicrobial Protection.

-Crush resistant.

-Antimicrobial Protection: Prevents odors, stains, degradation and breakage caused by bacterial attack. -Smooth stain-resistant cover.

-Resistant to oil, detergents, wear and tear and atmospheric agents.

-High temperature resistance.

-Highly flexible and wrinkle resistant.

-Long lasting.

Substrate: NBR/SBR synthetic rubber, black, smooth.

Reinforcement in synthetic fabric.

Cover: NBR/SBR rubber, blue, smooth.

Operating temperature: -40° to +120°

ATTENTION! Only available in random lengths: 20 to 95 meters.

50% of the volume in each delivery will be random lengths, the shortest length will be 20m, at least 50% will be fixed length as indicated in the table.

Inner hole diameter	External diameter	Pressure of exercise	pressure of explosion	Radius of curvature	Weight	Length rolls
mm	mm	bar	bar	mm	g/m	m
9.5	18.50	500	500	60	26.50	100
12.7	21.7	200	500	70	31.20	100
