

AIR/GSV HOSE

HOSES › Flexible pipes for ventilation or cold air extraction

Multilayer flexible PVC hose with synthetic wire reinforcement grid with internal steel helical spiral. Very robust and easy to handle with extreme flexibility. Excellent resistance to elongation and depression. Normally used as equipment on suction machines for industrial cleaning, it is in fact also suitable for the light suction of liquids.

Smooth abrasion resistant black interior, corrugated exterior, very light and flexible.

Color: Black with White Grille.

Operating temperature: -5°C +60°C +85°C peak for a few minutes.
