

ABRASIVE HOSE/10/SPO-BN FOOD GRADE - delivery

HOSES › Food grade hoses for abrasive fluids

Flexible hose for transferring abrasive FOOD products such as cereals, feed, dry seeds which generates high wear of the internal walls.

The extremely smooth and hard white internal surface facilitates the passage of flow, significantly reducing friction.

Tube in white food-grade rubber, high-resistance synthetic textile reinforcements and incorporated copper cable.

Corrugated cover in black EPDM rubber with canvas imprint, resistant to ozone and bad weather.

Steel spiral embedded in the wall

Working temperature -30°C +70°C (100°C peak).

On request: sizes for use, sleeves at the ends, specific fittings, product customisations.
