

PHARMACEUTICAL GRADE FOOD GRADE PLATINUM SILICONE HOSE

HOSES › Hoses for food products

PLATINUM silicone hoses produced by extrusion with a polyester braid woven inside the hose.

Applications: Suitable for transporting high-purity liquids in the food industry. It offers an extremely wide range of applications. The design balances strength and lightness, making it easy to handle. Thanks to its translucent appearance, the product inside the tube is partially visible during passage. Suitable for delivery only.

Characteristics:

- Odorless, tasteless and completely non-toxic.
- Can be equipped with stainless steel fittings
- The standard manufacturing length is 25 meters
- Temperature: -40°C to +180°C

Construction: Translucent and smooth interior and exterior. Extrusion construction with polyester yarn inside the tube. Food-grade silicone.
