

KYNAR PIPE - PVDF HD 4000

HOSES › Chemical hoses

Tubing made of KYNAR® HD 4000, rigid polyvinylidene fluoride (PVDF). Among PVDF products, it is the most resistant to abrasion and temperature and boasts excellent mechanical strength when used with many chemicals and solvents. It is inherently resistant to light, heat, and aging, and is inherently self-extinguishing (UL94 V0).

Abrasion resistant and suitable for use in applications requiring chemical resistance with low permeability.

NEUTRAL COLOR - standard packs of 100 meters

OPERATING TEMPERATURE : -40°C to 100°C

diameters mm	Weight gr/m	Radius Of curvature mm	Pressure of explosion bar	Pressure of exercise bar	Packaging rolls m
