

M220 - E22 - Filter-regulator and lubricator assembly

FITTINGS FOR COMPRESSED AIR › FITTINGS AND CONNECTIONS FOR PNEUMATIC SYSTEMS › F+R+L air treatment

GENERAL CHARACTERISTICS

M 220 - E/22	M 220 - E/22-P
Modular filter-regulator and lubricator unit with technopolymer glass	Modular filter-regulator and lubricator unit with metal bowl
M 220 - E/22/SC	M 220 - E/22/SC-P
Modular filter-regulator and lubricator unit with technopolymer bowl and automatic drain device	Modular filter-regulator and lubricator unit with metal bowl and automatic drain device

The **E/12** groups combine the function of **E/24** filter-regulator and **E/21** lubricator in a single unit .

The **E/44** filter-regulator has been designed to remove liquid and solid impurities in pneumatic systems. They are modular filters equipped with a **PE filter cartridge** which retains impurities with dimensions greater than **40 µ** . On request you can have different degrees of filtration **5 µ** or **20 µ** .

The operation of the **E/21** mist **lubricator** is based on immediate mixing of the oil. This mixing is optimal even with small air passages
