

HOSE CONNECTED TO PROBE

HOSES › *Self-bleeder hoses*

Thermoplastic polyester hose with built-in reinforcing polyester fiber braid, external cover in anti-abrasive polyurethane for greater durability.

Completely smooth internal and external surface.

It is assembled with male-male fittings, 1/2" gas-bsp on one side and 1/8" gas-bsp on the other. It is complete with nozzle, the fittings are pressed and take up little space, for the narrowest passages allowing maximum flexibility and accessibility in the ducts while avoiding blockages to a minimum. This pipe is particularly suitable for unblocking small pipes.

Mastertubi.it/q?293

Operating temperature: -40° +65° C.

Nominal diameter 3/16" (Ø4.8 internal Ø10.0 external).

Operating pressure 210, burst pressure 840 bar.

Bend radius 35 mm.

Weight 73 g/m.

Standard rolls of 10 or 20 metres, other lengths are available on request.
