

## GALVANIZED METALFLEX PIPE - STAINLESS STEEL

AUTO GAS SUCTION EQUIPMENT › ANTI-CRUSH FLEXIBLE HOSES FOR AUTO GAS

**Double-seam flexible metal tube with polygonal section without gasket** available in both galvanized steel and stainless steel. Unscratchable profile, resistant to torsional, axial tensile and compression loads. It can lengthen and shorten axially by approximately 25%.

On request it can be supplied with a rubber gasket or with a double-seamed ceramic gasket for high temperatures.

Use: discharge of hot gases derived from the combustion of motor vehicles, motor vehicles, agricultural machinery, diesel generators, extraction systems, protection of electrical cables. On request, possibility of inserting gaskets for special uses.

[Mastertubi.it/q?325](http://Mastertubi.it/q?325)

**ATTENTION:** the pipe has an assembly direction depending on the direction of flow

Maximum use temperature of the galvanized steel pipe 400°C

Maximum use temperature of the stainless steel tube 700°C

lengths available - minimum drilling lot: 10 meters stretched
