

SPIRALFLEX HOSE

HOSES › Flexible pipes for ventilation or cold air intakes

Flexible hose made with a sturdy PVC profile with adjustable coils, its particular structure allows the hose to assume the desired curves and positions.

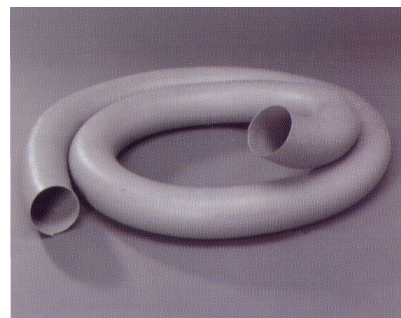

By rotating the coils it is possible to vary the diameter more or less up to 35% more or less compared to the nominal diameter. The structure of the coils allows elongation or compression from 15% to 45% depending on the section.

Operating temperature: -10° +80°C

Packaging: 5 meter rolls in cardboard box

Color: light grey.

Use: extraction of fumes, chips, sawdust, dust, pneumatic transport, as cable glands.
